

About your ukulele:

Makala MK-C Concert Ukulele
Strings: Aquila Super Nylgut®

How to care for your ukulele:

- When you aren't playing your instrument, keep it in its case
- Your instrument is hollow! Be sure to store it where it won't get stepped on or knocked into
- Wooden instruments should be kept out of the heat—don't leave your ukulele in a hot car or outside for long periods of time
- Remember to carry it "like a baby" when transporting it outside of its case
- Be gentle when twisting the tuning pegs
 - If a string breaks, [here is a video](#) on how to replace a string

Cleaning your ukulele:

- Do not use cleaning products on your ukulele!
- Wash your hands before playing to prevent build up
- Use a microfiber cloth, dry or damp to wipe down your ukulele if needed
